

Name of the organization: OPEN Dot Com S.p.A.

Type of stakeholder: Software vendors

Country: Italy

Q1:

The Draft perfectly cover all the ESRS DRs and fortunately our software follow this coverage

Q2:

We designed our program for soustainability statement such as the Draft's structure and we had much posity feddback about it

Q5a:

For us, boolean elements are difficult to run under our software and means to rebuild it for 60%

Q5b:

For users absolutely useful, but implement this it is not easy and allow the possibility manual tag boolean by the users it becomes difficult and not practical when they draw up the soustainability statement
