

Name of the organization: CEN & CENELEC

Type of stakeholder: Other (please specify)

Please specify: CEN & CENELEC

Country: Belgium

Q1:

Qualified yes, but I am not a specialist in the subject

Q2:

Qualified yes, but I am not a specialist in the subject

Q3:

The proposed hierarchy looks fit for purpose and seems lean (no duplication, and reuse of relevant elements)

Q5a:

Yes, the Booleans are useful to filter for relevant disclosures

Q5b:

Ability to filter + or - confirmations is a benefit as it enables users to filter for the type of confirmations they are looking for

Q6a:

No response, not familiar enough with the specs

Q6b:

No response, not familiar enough with the specs

Q9:

Dear, At CEN & CENELEC we are completing a SMART editor with release of a minimum viable product in early Q1 2025. We would be interested in comparing our approach to validation rules, tagging, Booleans and other taxonomy & XML features with the EFRAG approach. Possibly even identify synergies and foundations for compatibility. If interested, please get in touch with sgroven@cencenelec.eu Thank you and have a great day, Serge
